

OVERVIEW

The CTB Series contemporary center lens design delivers a soft natural glow with even illumination and minimized glare making it an attractive general-purpose ambient lighting solution. The optional factory-installed Sigtex Emergency Lighting Control option ensures full emergency code compliance at the lowest possible cost.

PROJECT:

TYPE:

CATALOG #:

SPECIAL FEATURES

- **Emergency lighting from 1,250 Lm to 2,100 Lm with adjustable Emergency Lighting Control (ELC), powered from a Sigtex low-voltage central battery system. See Page 3 for details.**
- Available with factory-installed UL Listed Emergency Lighting Control (ELC), for connection to a Sigtex central battery, DC emergency power system.
- Available in 3500k (warm/neutral white), 4000k (neutral white) & 5000k (cool white) color temperatures.
- Long life LEDs provide at least 144,000 hours of operation with at least 70% of initial lumen output (L70).**
- Provides 3,096 3,212 lumens and 130 135 lumens per watt (LPW)
- Uniform illumination with no visible LED pixilation.
- Universal 120 277 AC voltage (50 60Hz) is standard.
- 0 10vdc, continuous dimming capability is standard.
- Power factor > 0.90.
- Total harmonic distortion < 20%.
- Color rendering index (R a) 80.
- Steel housing and PMMA lens.
- Easy installation in new construction or retrofit. Fits in standard 2' x 2' or 2' x 4' grid ceilings.
- Built in earthquake clips provide secure installation in grid ceilings.
- Standard mounting options include recessed mounting in grid ceilings, or suspended mounting using earthquake clips. For other mounting options, see Mounting Means.

* Contact factory for other color temperatures and lumen packages.

** L70 hours are IES TM-21-11 calculated hours.

WARRANTY & LISTINGS

- cULus listed for damp locations and insulated ceiling in ambient temperatures from 2020°C to 50°C (44°F to 122 122°F).
- UL listed for maximum of 4, 12 AWG through branch circuit conductor.
- Inherently protected.
- Type IC rated for insulated ceilings.
- DLC 5.1 premium approved.
- Low risk of flicker (per IEEE1789 2015) at 100% light output level.
- Complies with FCC Part 15, class B.
- Complies with IEEE C.62.41 1991, Class A input transient surge protection (2.5kV).
- View Sigtex [Warranty](#) for further details

Emergency Lighting with ELC

The following Point-to-Point sample shows typical performance in the medium power range for both fixture and ELC, based on IES files and using a light loss factor (LLF) calculated as follows:

LIGHT LOSS FACTOR = ELC Emergency Power (Watts)* / Fixture Normal Power (Watts)

LLF = $\frac{\text{ELC Emergency Power}^* (\text{Watts})}{\text{Fixture Normal Power (Watts)}}$ *Power value and ELC Type are given in the OPTION CODE above.
 Example: ELC10P1 = 10 Watts Emergency Power for 90 mins: Package Type P1

The calculation is based on illumination values given in NFPA 101 and NEC 70, which stipulate an initial minimum average of 1 Fc at floor level, a minimum of 0.1 Fc at any point, and a uniformity ratio no higher than 40:1. NOTE, values are allowed to decrease 40% after 90 minutes, but ELC is a constant power device so emergency illumination does NOT decrease.

MODEL	ELC OPTION #	ELC POWER	EMERGENCY LUMENS	LLF	MOUNT HEIGHT	AVG. LUMENS ON PATHWAY	MAX/MIN UNIFORMITY
CTB24	ELC10P1	10 Watts	1383	0.30	12 FT	3.07 Fc	17.00

MOUNTING MEANS (Order Separately)

- Optional surface mounting kits (SMKT-22, SMKT-24) mounts below the ceiling.
- Optional flange mounting kits provide for recessed installation on plaster or other hard ceilings. Attach Flange Mount Kit (FLANGEKIT22-ET) to ceiling joists or other stationary structures, and the panel is mounted flush to the ceiling.
- Optional cable mounting kits provide additional security, as well as suspended mounting. Attach one end of the Cable Mount Kit (LEDPNL-CMK) to luminaire earthquake clips using spring clips, and attach the other end to stationary structures using the adjustable, locking ceiling attachment.
